- 42,762 GB-filled rockets and warheads
- 8,431 GB-filled 8-inch projectiles
- 60,221 gallons of liquid GB
- 23 igloos emptied

Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the environment, general public, and personnel involved in the disposal effort.

- Disposal is safer than continued storage.
- Incineration is truly a safe, efficient disposal process.
- The Army is committed to the safety of the community and the environment.
