

MONTHLY UPDATE

DESERET CHEMICAL DEPOT
TOOELE CHEMICAL AGENT DISPOSAL FACILITY

*TOCDF Chemical Demilitarization Operations: Nov. 18, 2005 - Dec. 15, 2005

WWW.CMA.ARMY.MIL

Safe, secure storage

Milestone Dates

- Chemical weapons storage began in 1942
- Construction of TOCDF began in 1989
- Disposal operations began in 1996
- Complete destruction of GB nerve agent-filled munitions on March 15, 2002
- Complete destruction of VX nerve agent-filled munitions on June 3, 2005

On-Site Container

TOCDF Update

- Decontamination and other plant changeover activities in preparation for the TOCDF Mustard Agent Destruction Campaign continue. As part of these activities, TOCDF workers have begun replacing the agent-contaminated charcoal media in the heating, ventilation and air conditioning filter banks.
- Work continues to modify two storage igloos that will be used in support of the sampling operations for the mustard-filled ton containers (TCs) in preparation for the disposal of the mustard TCs. The work is approximately 65 percent complete, including installation of the glove boxes, utility work for electrical connections, work on the exhaust ventilation system and concrete work.

Protective Equipment

Leading the Way to a Safer Future

The Tooele Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Deseret Chemical Depot, while ensuring maximum protection for our workers, our community and our environment.

Monitoring

Construction of a filter bank for a storage igloo that will be used in support of the sampling operations. Prior to disposal operations, all mustard TCs will be sampled and segregated based on their mercury content and/or heel depth.
