Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the general public, environment, and personnel involved in the storage and disposal effort.

- ◆ Disposal is safer than continued storage.
- ◆ Incineration is truly a safe, efficient disposal process.
- ◆ More than 10,400 tons of chemical agent and more than 1,649,100 weapons have been safely incinerated by the U.S. since 1990.
- ◆ Pollution control systems protect people, and the environment.
