Control Room operators (*third picture, left*) work in the Control Room (CON) often referred to as the “brain” of PBCDF. CON operators are responsible for monitoring and operating the computerized equipment used in the chemical weapons disposal process for activities such as the punching and draining of nerve-agent filled rockets or the shearing of nerve-agent drained rockets. CON operators are part of PBCDF’s highly-skilled workforce, completing several hundred hours of training for certification.

PBCDF Milestone Dates:

- PBA Chemical Weapons Stockpile Storage began in 1945
- Construction began in 1999
- Construction complete in 2002
- Testing and Training complete in 2005
- Disposal Operations began in March 2005
