PBCDF is currently in a scheduled outage for changeover activities to prepare for mustard ton container disposal operations. The Liquid Incinerator primary and secondary chambers ramped up to normal operating temperature. Systemization of the Automatic Continuous Air Monitoring Systems for mustard operations is more than 90% complete. Systemization refers to the activities performed to ensure that the equipment is functioning properly prior to disposal operations. Both the Metal Parts Furnace and the Liquid Incinerator are at normal operating temperature.

Pictured Above, a monitoring technician performs a challenge of an Automatic Continuous Air Monitoring System (ACAMS). Challenges of ACAMS are performed daily to ensure that the monitoring equipment is operating properly. Photo - URS EG&G Washington Defense Group – March '08.
