### ANCDF completes ton container processing Projectile demilitarization to resume after outage

Disposal operations have concluded for the mustard agent-filled 108 bulk containers that were stored at Anniston Army Depot. Each container, almost seven feet long and 30½ inches in diameter, held approximately 170 gallons of agent. Demilitarization operations will resume following a scheduled utility company power outage for maintenance work. Anniston Chemical Agent Disposal Facility (ANCDF) operators will then process 105mm projectiles. The artillery shells contain two quarts of agent, weigh 33 pounds and are 15.7 inches long. (Miklik)
