

## MOBILE COMMAND POST (MCP)

*The U.S. Army Chemical Materials Activity Recovered Chemical Materiel Directorate provides centralized management and direction to the Department of Defense for the assessment and destruction of recovered chemical warfare materiel (RCWM) in a safe and environmentally compliant manner.*

**RCMD's Mobile Command Post** improves oversight of RCWM site operations by providing total communications-management control and assisting personnel in gathering, documenting, and archiving pertinent RCWM operations data.

The MCP can be deployed for both quick-response and long-term treatment operations.

### MCP Features

- Eight-channel digital video recording system with the capacity to store 300 hours of high-quality video
- Eight independent cameras for monitoring/recording site operations
- Audio communication capability between managers and equipment operators
- External audio/video hard drive for backup and archive of site operations
- 10-meter mast containing weather system and site camera, allowing total site visibility during operations

### MCP Benefits

- Reduced site set-up time
- Reduced electromagnetic interference for improved wireless communications
- Improved response time
- Onboard heating and cooling systems for operational-environment comfort during extreme weather conditions
