

CHEMICAL AGENT IDENTIFICATION SETS (CAIS) BOTTLE HOLDER FOR EDS

WHAT

The CAIS Bottle Holder for the EDS will allow for the neutralization of up to 178 K-941 bottles in a single operation. CAIS are typically recovered in the single digits; however, thousands of CAIS recovered during environmental remediation at Pine Bluff Arsenal, Arkansas, await destruction.

WHY

RCMD uses the Single CAIS Access Neutralization System (SCANS), which effectively destroys one CAIS item at a time. The CAIS bottle holder for the EDS will save RCMD from performing thousands of individual SCANS operations and reduce operations time from years to weeks.
